**NOTES**

- Weightings agreed with Regional Waste Groups
- No additional weight is applied to polygons in either category 3 and 4,
- Polygons in category 1 are identified as 1st areas of search for in building and open air facilities.

**Recommendation:**
This layer be used for the areas of search project and displayed in accordance with the "Active_Clo" field whereby:

- This applies to a number of landfill sites on the layer that should be excluded from the GIS for reasons explained in the notes field.
- Soils as are required to protect the cap, i.e., the pollution prevention structures. It need not include full restoration, planting and contouring.

- For the purposes of determining definitive closure, restoration shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

- Guidance note 7 licence. This category is a proxy for fully restored but actually refers to definitive closure which has the meaning stated in regulatory regulations 2002, but have not yet reached the end of the closure and aftercare period enabling the licence holder to surrender their licence.

- This applies to landfill sites which have reached definitive closure in accord with Regulation 15 (4) of the Landfill (England and Wales) Regulations 2002, as amended.

- 3. Licensed/permitted landfills which are fully restored

- 1. Licensed/permitted landfills which are actively receiving (or intending to receive) waste according to the following 3 categories:

  d) sites that did not make a PPC permit application but have not yet reached the deadline to cease tipping under a closure notice

  b) sites whose PPC permit application is currently under determination

  1. This applies to landfill sites which are currently receiving or intending to receive waste this includes:

     a) site relating to 'existing' or 'allocated' industrial land.

     b) industrial land is shown and symbolised as either a site relating to 'existing' or 'allocated' industrial land.

     c) to 'existing' or 'allocated' industrial land may offer potential for the locating of sub-regional waste facilities and are weighted as 1 in

     d) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     e) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     f) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     g) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     h) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     i) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     j) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     k) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     l) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     m) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     n) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     o) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     p) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     q) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     r) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     s) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     t) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     u) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     v) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     w) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     x) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     y) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.

     z) areas of search for sub-regional waste facilities shall mean the installation of the cap, drainage layer and such restoration as may be required by any planning permission.
