

End of Life Care Training

Designed for:

Care home managers and team leaders

Other health and social care staff and volunteers are welcome to attend

Course aims and objectives:

END OF LIFE CLINICAL ISSUES

Aims of the session are to

- increase understanding and recognition of when End of Life is occurring
- explore and deepen understanding of clinical signs, (breathlessness, pain and agitation)
- better understand clinical interventions to support patient and families

TALKING WITH PATIENTS AND FAMILIES AT THE END OF LIFE

Aims of the session are to

- encourage a professional conversation and sharing of good practice
- explore issues such as anger, denial and grief
- enable practitioners to better deal with difficult conversations
- revisit the 'CARE DECISIONS LAST DAYS OF LIFE' documentation
- explore the wider issues of decision making at the end of life
